

MAD® ALU TWIN BACK BONE ROD POD

Aluminium (so: lightweight) rod pod. Twin back bone, for increased stability. The height and length are adjustable, by means of twist locks. The big advantage of twist locks: there are no screws that can get lost. And since there are almost no screws sticking out the anglers doesn't have to worry too much that his line will get caught behind them. Simple, complete and effective rod pods. Comes in a heavy duty, 100% polyester carry bag.

Available in a three- and a four-rod version.

- Maximum height: 43cm
- Maximum length: 145cm

2900 028		MAD ALU TWIN BACK BONE ROD POD - 4 RODS	1/1/1	2,26kg

MAD® ROD POD – SLR II

This extremely clever rod pod for three rods is especially designed for fishing big waters, like wide rivers and huge lakes. The improved successor of the very popular SLR rod pod. The MAD® Super Long Range (SLR) II rod pod enables the angler to position his rods towards the sky, successfully reducing interferences by waves, dirt, animals and fish. Compared to the previous model, this pod is lighter, has even stronger legs as well as joints and is much easier to handle. The pod is one of the most versatile rod pods on today's market thanks to the two extra telescopic legs. This way you can transform the high standing distance version in a more or less standard pod in just seconds! Delivered in a padded transport bag of 600D nylon (100%).

- Maximum height: 130cm
- Maximum length: 150cm
- Transport length: 82 x 23 x 9cm
- Weight: 2,75kg

MAD® 4-WAY TRI-POD

Finally the weigh pod where we all have been waiting for. Its two-piece legs have been made out of strong and stable alloy material with a matt green powder

coating. The special moulded head is made out of shockproof ABS-graphite, which makes it perfectly suitable for its main purpose: weighing big carp!
