

## DAM FIGHTER PRO RODS

A wide range of Fighter Pro rods. Composite carbon rods, specifically designed for the occasional angler who wants to go fishing every now and then but doesn't want to buy an expensive carbon rod. There are several rod series in the Fighter Pro rod range, such as an adjustable trout rod, a telescopic surf rod, three-piece surf

rods, carp, feeder and match rods, two-piece spinning rods, telescopic spinning rods, a telescopic pike rod and even a trolling rod. For each of these rods we now also offer, separately, a matching Fighter Pro reel, complete with nylon. Ideal for making combos for budget conscious anglers.
