

### INTERCEPTOR FLUORO CARBON COATED TAPERED LEADERS

The ultimate solution for easy and effective long casting. We have used a softer version of the Co-Polymers used in the Interceptor Long Distance combined with a coating process that uses 100% Fluoro Carbon. This makes this tapered leader virtually invisible in the water, and with the same sinking ratio and abrasion resistance of the lines made using Fluoro Carbon. The conical shape makes it possible to tie perfect and compact knots, which don't create any problem or friction when extreme casting is needed. They are packed in a wide diameter spool, which contains 4 conical sections of 12m each divided by a small sticker indicating exactly where to cut.

- Reduced stretch
- Easy to knot
- Virtually invisible in water
- High abrasion resistance
- 4 conical section of 12m each per spool

ITEM NO.	LENGTH	BS (LB)	PCS	COLOUR
47216	12m	12-32lbs	4pcs	Clear
47217	12m	15-40lbs	4pcs	Clear
47218	12m	18-50lbs	4pcs	Clear

Pack size: 6

### BULLDOZER SNAG LEADER

The strongest snag and shock leader available. High density Co-polymer combined with a special outer treatment provides the BULLDOZER SNAG LEADER with the best abrasion resistance and the fastest sinking ratio available, all combined with an incredibly smooth surface which allows to tie perfect knots even with the bigger diameters. Special attention has been given to the color : we have combined black and green in matt finish to avoid any possible light reflection on the rigs area.

- Fast Sinking
- Supreme abrasion resistance
- Easy knot treatment
- No reflection color
- Green & black camo

ITEM NO.	LENGTH	BS (LB)	BS (KG)	SIZE	COLOUR
44685	100m	24lbs	11.0kg	0.40mm	Camo
44686	100m	32lbs	15.6kg	0.50mm	Camo
44687	100m	44lbs	21.3kg	0.60mm	Camo
44688	100m	58lbs	27.8kg	0.70mm	Camo

Pack size: 10

### MARKER BRAID

High visibility braided line specially designed for marker floats and sounder leads. Thin and strong, the surface has a special high-flow treatment to help reach the maximum distance. 200 meter spool with color marks to immediately recognize the casting distance and the water depth when using a marker float. We have used a new system extremely easy to understand and to "read" the line.

From 0m to 100m the braid is marked with 50cm sections in green and yellow.  
From 100m to 200m the braid is marked with 50cm sections in red and yellow.  
Every 10 meters are marked with a short section in black that gives right away the indication of the distance.

- High flow surface for maximum distance
- No memory – No stretch
- 50cm colored sections
- Distinctive marks every 10 meters

ITEM NO.	DESCRIPTION
48430	PL Marker Braid 0.19mm 20lbs 200m

Pack size: 5

### SPOD BRAID

Heavy duty floating braid, specifically designed for spodding. We have used the same marking system for each 10 meter section to help casting distance accuracy and understanding. We recommend to use the Spod Braid together with our Spodding Tapered Leaders for maximum performance.

- High visibility color
- Floating
- 10m distance mark
- Smooth surface for maximum distance

ITEM NO.	DESCRIPTION
48431	PL Spod Braid 0.17mm 18lbs 200m

Pack size: 5
