

SLP ROD POD

High grade Aluminum body, the SLP (self leveling pod) rod pod features a new legs adjusting system that will make rod pod positioning easy and fast like never before. Once in your swim you just need to open the rod pod legs and press the button placed on the main frame knob, moving then the rod pod body in the direction you want to place it correctly, the legs will extend and shorten themselves. Once you have placed the rod pod in the position you want just release the button, job done !
