

C3 RAS

C3 RAS Evolutive

C3 RAS

Distance, accuracy and sensitivity.

These are the three key features of our new C3 RAS carp rods, all combined with top quality components, a Fuji Gold DPS reel seat and ultra-reliable SIC guides. The totally new C3 RAS is made from a 30 Ton High Modulus carbon blank with low resins and a really unique taper that gives this rod a very light weight and very fast response when casting, making it possible to reach extreme distances with a relatively light lead. The Rods feature a fast-parabolic action.

The Evolutive version is made for the lovers of the "old style" carp rods, featuring a more parabolic action and 8+1 guides, the perfect solution for the anglers who want to enjoy the top fight with any carp.

- 30 TON HM Blank
- Fuji DPS Gold reels seat
- SIC guides
- Fast-Parabolic action
