

SALIS - SINGLE HAND SHOOTING HEADS

We believe that slow turnovers are one of the key factors describing really good shooting heads. Slow turnovers mean that the head will fly longer and bring with it more running line before it straightens. The Salis shooting heads are just like this: Delicately balanced, smoothly tapered, precise and eager to fly all the way. As perfect for coastal sea trout fishing as for hunting big pike in one of Scandinavia's countless lakes and, of course, priceless when fishing salmon and sea trout in our legendary salmon rivers. These shooting heads will perform optimally with poly leaders and our soft and tiny loops will ensure almost seamless loop-to-loop setups for so many kinds of single hand fly fishing.

- Micro Looped in both ends

MAGNITUDE - DOUBLE HAND SHOOTING HEADS - MEDIUM LENGTH

These shooting heads are designed from the philosophy, Delicately balanced, smoothly tapered, precise and eager to fly all the way. Some people seem to think that double hand fly fishing requires only power and distance, but we like to think that modern salmon fishing requires stealth, precise fly casting and careful presentations at any distance. Our Magnitude lines will help you with such an approach. Perfectly balanced for slow turnovers, tight loops and good presentations; always prepared to carry both small and big flies with equal elegance. The Magnitude shooting heads will perform optimally with poly leaders and our soft and tiny loops will ensure almost seamless loop-to-loop setups for all kinds of double hand fly fishing.
