

DAM POWER TROUT SYSTEM RODS

Fishing for trout in so-called “put and take lakes” is still immensely popular and gets more and more refined. Therefore DAM has upgraded its PTS Trout System (better known as PTS) carbon rod series. Regardless if the angler wants to use spinners, finesse lures, floats or bombarda’s, there is a dedicated rod available in the overworked PTS rod series.

DAM PTS SBIROLINO 28

Telescopic, 24 ton carbon rod specially designed for sbirolino fishing at long distances. Casting weight: up to 28 gram.

DAM PTS TELE DISTANCE

Telescopic, 24 ton carbon trout rods that are powerful and fast enough to reach trout that would otherwise be out of reach.

DAM PTS TREMALINO

Lightweight and slim, 24 ton carbon telescopic trout rods, for lake fishing with sbirolinos.

DAM PTS ULTRA-LIGHT SPIN

Light, parabolic carbon rods for ultra-light spinning for trout in put and take lakes or small streams.
