MAD® SLIMLINE HOLDALLS

The new MAD® Slimline Holdalls are kept compact in size, but still offering maximum protection. They don't have a separate pole, as we wanted to keep the pack size down to a minimum, so the stability comes from the inserted rods and/or net handle. All models have been designed with a protrusion to offer enough space for the popular 50mm butt rings. Several straps take care of externally attached, as our Slimline Holdalls offer additional space for spare rods, marker rods, banksticks or weigh slings on the outside. The padded shoulder strap enables effortless carrying.
