

MAD® TOUCHDOWN BACKLEADS

Intelligent and very stable backleads in the great quality that is standard for all MAD® products. Backleads are essential to have in your tackle box, because you never know if the situation requires them and it can be the difference between blanking and catching fish. Available in the allround 28gr version and one of 43gr for tougher conditions.

MAD® SLIDING BACK-LEAD

Our MAD® Sliding Back Leads come complete with 4mm beads and make sure the last few metres of your rig are well concealed and out of the way. Simply attach on your mainline behind your leader and the back leads will slide up the line during the cast. Available in 10g (7 per pack) and 5g (10 per pack).

MAD® BACK LEAD SYSTEMS

These back lead systems allow you to easily attach and/or exchange a swivel lead. Available in two colours: green and brown.

MAD® TUBE THREADER STAINLESS STEEL

Ever tried to push a thin line through a long anti-tangle tube? Or a braided line? Terrible job! We have the perfect solution: a very thin, stainless steel wire with an eye: the MAD® Tube Threader. You effortlessly stick the threader through the anti-tangle tube and pull the mainline through it. So easy!
